Mopar Now Offering Mopar® Connect

Fully Connected Car Solution System Offers Drivers More App Access

Santa Rosa, CA – Autonet Mobile, the first Internet-based telematics and applications platform for vehicles, announced today that Mopar has launched Mopar® Connect, powered by Autonet Mobile. Mopar Connect is a complete telematics service that allows customers to control their car from a Smartphone. From starting your car to locking your doors and opening your trunk, the Mopar® Connect system offers the most secure and reliable service on the market

Mopar® Connect's cloud based services keep car owners constantly linked to their vehicles anywhere from coast to coast at anytime. In addition to In-Car WiFi the systems offers Alarm Notifications, a find my car feature, Valet Mode, Speed Tracker, Curfew Management, Geo Zones, Parental Controls and the ability to remotely operate the full range of functions normally found on your key fob.

"The demands of the connected driver are rapidly changing," said Phil Hughes, Autonet Mobile's President. "Autonet Mobile is excited to power the Mopar® Connect system and include our technology into a full suite of cloud solutions available to Chrysler customers across the country."

The Mopar® Connect system is available in new Chrysler, Jeep, Dodge, and Ram vehicles, or can be dealer installed in existing models. Log onto http://www.moparconnect.com for a complete list of compatible models and years.

About Autonet Mobile

Founded in 2005, Autonet Mobile is the first Internet-based telematics and applications service designed to maintain wireless connectivity to vehicles in motion. For more information about Autonet Mobile, visit http://www.autonetmobile.com or call 1-800-977-2107 for customer support.
