

UCONNECT WEB WINS GOOD HOUSEKEEPING VIP AWARD

POWERED BY AUTONET MOBILE, UCONNECT WEB TURNS VEHICLES INTO WIFI HOTSPOTS

San Francisco, Calif. (February 24, 2009) – Chrysler’s uconnect web, powered by Autonet Mobile, has received a VIP Award (Very Innovative Products) from Good Housekeeping. The first annual VIP Awards, announced in this month’s Good Housekeeping magazine, recognized the top 10 innovative products that provide families with value, reliability and ease of use.

Good Housekeeping said this about uconnect web, “Cross the car off the list of places where there’s no Internet access. Now passengers in new Chrysler, Jeep, and Dodge vehicles can sign up for wireless Internet service and use their laptops to check directions or weather reports, make dinner reservations, send e-mail, watch streaming movies, or play video games. And, if the driver pulls over to the side of the road, she has one more way to stay connected — particularly helpful if she’s lost or stranded.”

During 2008, Good Housekeeping’s Research Institute reviewed thousands of products in their labs with three criteria in mind for VIP Award winners: problem-solving, performance, and innovation. The winners of Good Housekeeping’s VIP Awards met all three criteria.

uconnect web, powered by Autonet Mobile—the world’s first in-car internet service provider—turns vehicles into WiFi hotspots, delivering reliable and easy-to-use internet access. Families can now bring all of their own WiFi-enabled devices such as laptops, web tablets, PSPs, and other devices on the road. The kids in the back seat can feed their Webkinz pets online, do homework, IM or play online games while Mom checks traffic and weather reports, and books a dinner reservation.

“We are honored that uconnect web was chosen by Good Housekeeping for their VIP Awards,” said Sterling Pratz, CEO of Autonet Mobile. “Working with Chrysler we have been able to provide thousands of passengers with reliable and easy to use WiFi internet that lets them access an endless variety of entertainment and information choices while in their vehicles. We are committed to developing new products that keep families connected and entertained while on the road.”

About Autonet Mobile

Autonet Mobile is the world’s first in-car Internet service provider. Founded by a corporate executive and former race car driver and a leading network architect and designer, the company is dedicated to enhancing the in-car experience by bringing the power of the Internet to the 200+ million cars on the road in the U.S. Autonet Mobile currently provides uconnect web as a dealer installed Mopar® Accessory that is available to 3,700 Chrysler, Jeep® and Dodge dealerships nationwide.
