

AUTONET MOBILE TAPS INSTALLERNET TO EXPAND INSTALLATION SERVICES NATIONWIDE

ALLOWS CUSTOMERS TO GET AUTONET INSTALLED ANYWHERE IN THE U.S. QUICKLY AND EASILY

Autonet Mobile on display in InstallerNet's CES Booth 3206

Las Vegas, January 8, 2009 – Autonet Mobile, the world's first in-car internet provider, today announced an agreement with InstallerNet, the largest mobile installation network for in-car electronics, that makes installing Autonet Mobile simple and reliable. Each Autonet Mobile unit will now come with an InstallCard that provides consumers with the ability to get their Autonet Mobile unit installed in their vehicle at home, in the office or at any authorized InstallerNet location.

By leveraging InstallerNet's 3,000 plus authorized installation locations nationwide the Autonet Mobile InstallCard will allow customers to schedule a professional installation by a MECP certified installer online or by calling one of InstallerNet's friendly installation coordinators.

"Similar to a home or office wireless router, Autonet Mobile installs in any vehicle and features advanced technology to maintain signal strength while the vehicle is in motion. Autonet Mobile's innovative product not only allows consumers in-car internet access, but enables a wide range of future in-vehicle products and services," said Bob Fields, InstallerNet's vice president of Mobile Electronics.

Autonet Mobile will be showcased along with other manufacturer products in InstallerNet's CES Booth 3206 in the North Hall of the Las Vegas Convention Center. InstallerNet will also install the Autonet Mobile device across its entire ProTeam mobile van fleet so Regional ProTeam Managers will be able to introduce its installer membership to the product and program. InstallerNet recently announced its new Northwest ProTeam Regional Manager based in Seattle and will have a ProTeam Van on display within the CES booth.

“We are delighted to be offering InstallerNet’s professional services to our customers. As we continue to expand, our partnership with InstallerNet allows us to make it even easier for our customers to get our product on a national basis,” said Sterling Pratz, CEO of Autonet Mobile.

Autonet Mobile turns any vehicle into a WiFi hotspot allowing internet access for every passenger. With Autonet Mobile all passengers can stay connected to the internet -- the children in the back seat can feed their Webkinz pets, do homework, IM or play online games, while Mom checks traffic or weather reports, books a dinner reservation or makes a last minute purchase online while Dad is driving. Autonet Mobile works with any WiFi enabled device including Apple’s iTouch, iPhone, laptops, and gaming devices.

About Autonet Mobile

Autonet Mobile is the world’s first in-car internet service provider. Founded by a corporate executive and former race car driver and a leading network architect and designer, the company is dedicated to enhancing the in-car experience by bringing the power of the Internet to the 200+ million cars on the road in the U.S. Autonet Mobile currently provides uconnect web as a dealer installed Mopar® Accessory that is available to 3,700 Chrysler, Jeep® and Dodge dealerships nationwide.
